Hypex Filter Design installation and Hypex FusionAmp Firmware update tutorial

1. Hypex Filter Design Installation

1.1: Software download

Step 1

Go to www.hypex.nl and select **Accessories** in the tab Products.

Step 2

Select Hypex Filter Design.

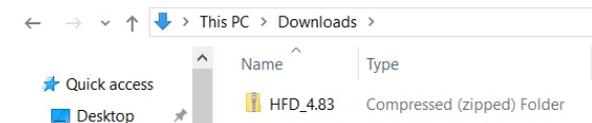

Step 3

Select Filter Design x.xx for the latest version and follow the download instructions from your webbrowser.

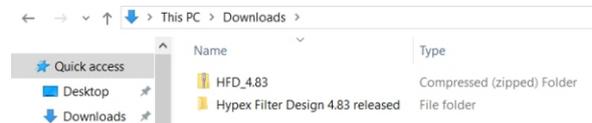

Step 4

Open the download location with Windows File Explorer and locate the compressed HFD-file.

Step 5

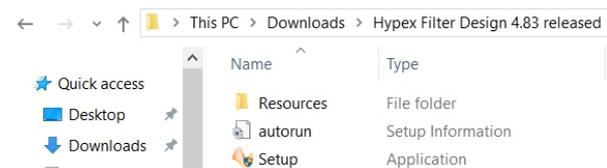

Unpack the file.

1.2: Software installation

Step 1

Open the unpacked folder and run **Setup**.

Hypex Filter Design Installer will then prompt:

Hypex Filter Design installation and Hypex FusionAmp Firmware update tutorial

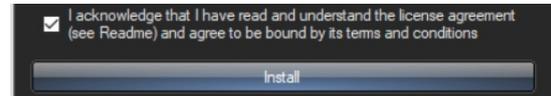

Step 2

Press **Readme** button to view release notes and additional information.

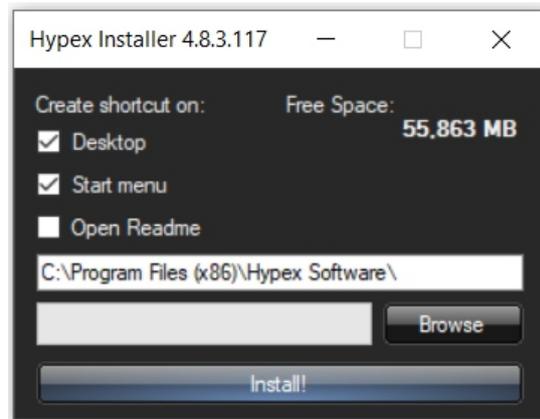

Step 3

Select the checkbox to agree and press **Install** button to proceed.

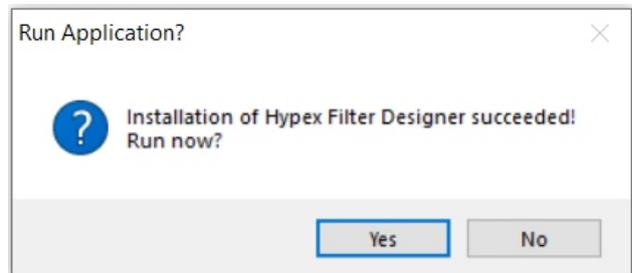

Step 4

Select preferences, choose software destination and press **Install!** button.

Step 5

Press **Yes** button to end the installation process and proceed to run HFD.

2. Hypex FusionAmp Firmware Update

2.1: Run program and connect FusionAmp

Step 1

Locate HFD or the shortcut and execute HFD.

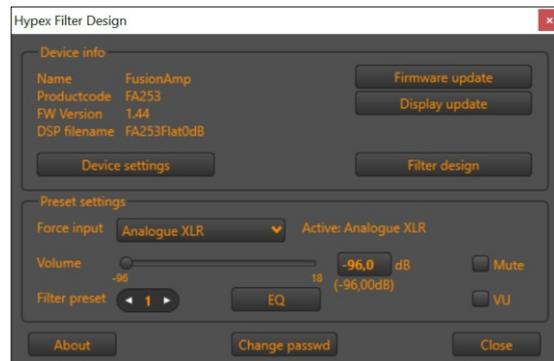

Step 2

Connect the FusionAmp with USB.

Step 3

Power on the FusionAmp. HFD automatically detects the device and displays the current firmware version in **Device info**.

2.2: DSP Firmware Update

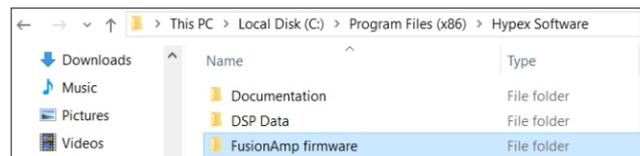

Step 1

Press the button **Firmware update**.

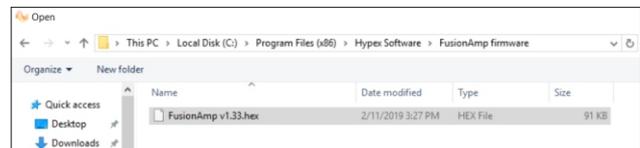

Step 2

The firmware* can be found in the folder **FusionAmp Firmware**.

Select the file **FusionAmp vx.xx** and press **Open**.

* Note: Check our website for the latest version: Locate your product and select the **Downloads** tab for additional files.

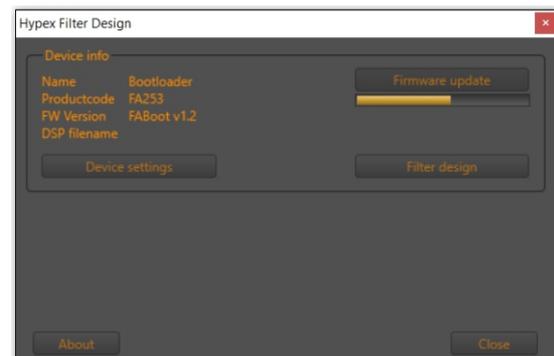

Step 3

HFD automatically updates the firmware on the device.

The lights on the FusionAmp ('Prot' and 'P1') will blink during this process.

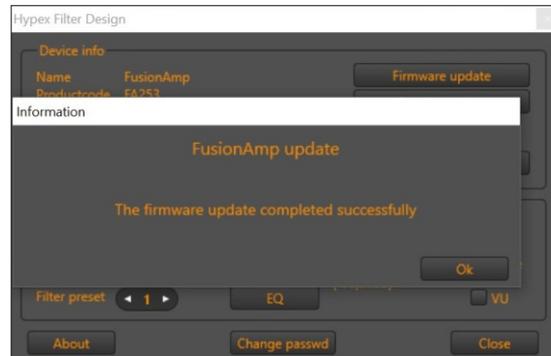

! Don't shut down or disconnect the usb-cable. This could damage the FusionAmp!

Hypex Filter Design installation and Hypex FusionAmp Firmware update tutorial

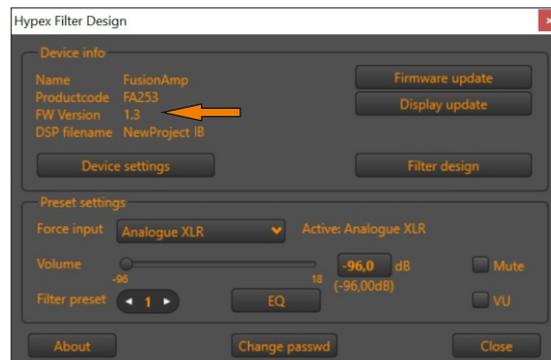

Step 4

The FusionAmp automatically reboots when updating is completed.
Press **Ok** to finish the process.

2.3: Update complete

Confirm :
When the update process is successfully executed the new firmware version is shown in HFD.

Power off/on:

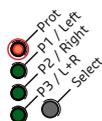

In case of a Master/Slave configuration:
Follow step 1 to 4.
In case of a single FusionAmp:
Execute only Step 2 and 4.

Step 1

Power down the Slave.

Step 2

Power down the Master and wait until the red light 'Prot' on the FusionAmp is turned off.

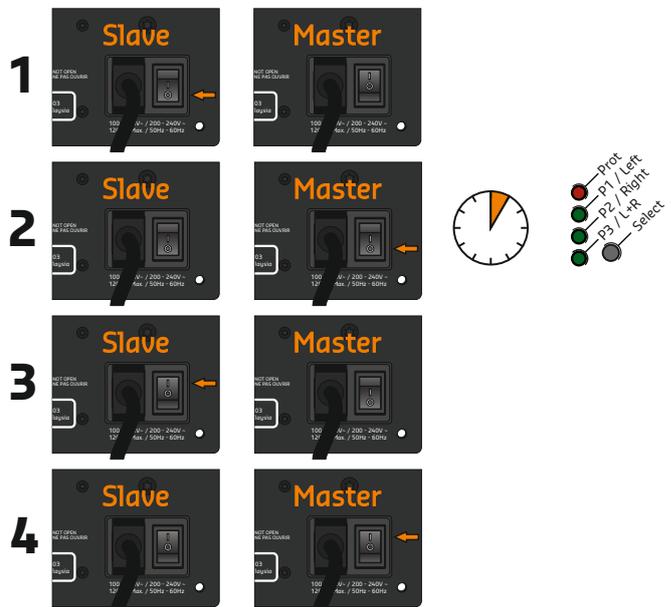

Step 3

Power up the Slave.
(This is necessary for the Master to be able to detect the Slave and configure its settings).

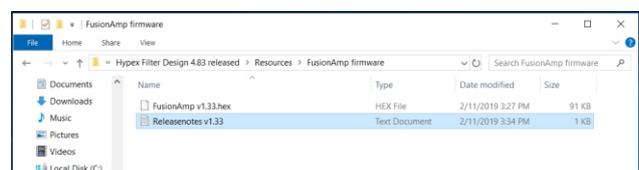

Step 4

Power up the Master.

Note:

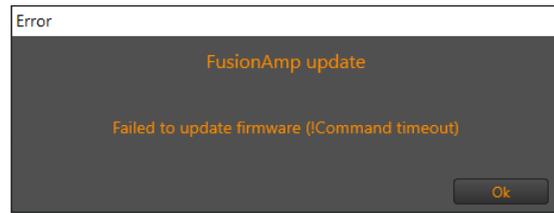

Release notes can be found in the same folder as the firmware:

2.4: Troubleshooting

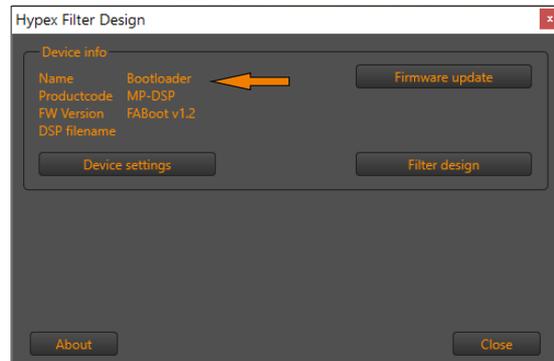

The next message is displayed in case of an error during the update process.

When the device name is **Bootloader** after turning on or reconnecting, the same error occurred.

In this case, the FusionAmp is not broken; it will not function, however the firmware can still be re-installed.

Execute chapter 2.2 on page 4 in order to (re-)install the firmware to fix it.

3. FA OLED Display Firmware Update

3.1: Run program and connect FusionAmp

■ If the device or software is not ready yet: Follow the instructions in chapter 2.1 and continue with chapter 3.2.

3.2: FA OLED Display Firmware Update

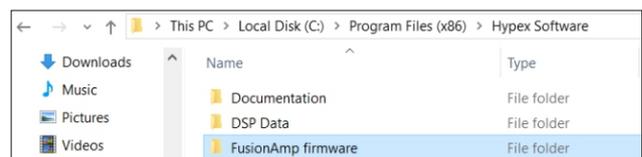

■ Step 1

Press the button **Display update**.

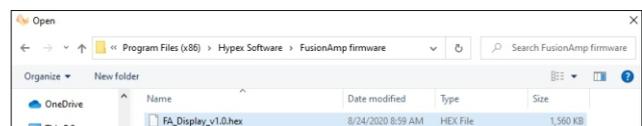

■ Step 2

After you have installed the latest HFD software, the display firmware* can be found in the folder **FusionAmp Firmware**.

Select the file **FA_Display_vx.x** and press **Open**.

* Note: Check for the latest version our website: Locate the Fusion OLED display product page and select the **Downloads** tab for additional files.

■ Step 3

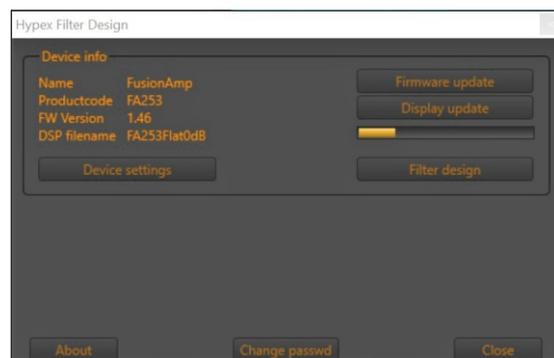

HFD automatically updates the firmware on the display.

The status is shown in HFD and the display will switch to bootloader status.

There is nothing wrong if this process will take a while...

! Power and connections must be maintained during the upload process until the next step.

Step 4

A popup window will confirm a successful update.

The display will show the word **PASS**.

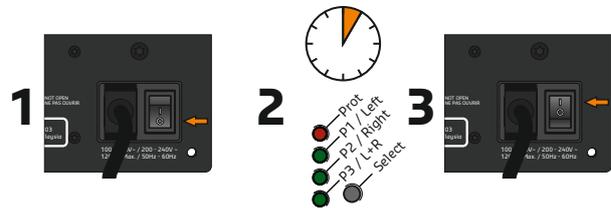

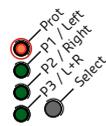

Press **Ok** to finish the process.

3.3: Update complete

Step 1

Power down the FusionAmp and wait until the red light 'Prot' on the FusionAmp is turned off.

Step 2

Wait at least 5 seconds.

Step 3

Power up the the FusionAmp.

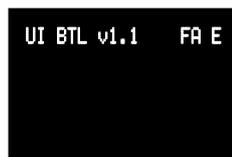

3.4: Troubleshooting

The next message is displayed in HFD in case of an error during the update process.

The display will freeze at the line it was processing.

If this error occurred before re-starting the device, HFD will not show a warning but the IR-receiver is unresponsive and the display is still showing bootloader-mode.

In both cases:

Execute the update-process starting at chapter 3.2 and the display will function normally again after a successful update.

Note:

Release notes can be found in the same folder as the firmware:
